AI Engineer with **2 years of experience** building production-scale **Generative AI, RAG, and multi-agent systems, delivering 2+ MVP client solutions**. Achieved **75% reduction in GPU inference costs** and **70% reduction in manual testing** effort through LLM optimization, automated evaluation frameworks, and enterprise AI platform development.

SKILLS

Programming Python, SQL, Git, C++
Generative AI LangChain, LangGraph, Langfuse, RAG, Multimodal RAG, Agentic AI, LLM Evaluation, LLM-as-a-Judge, Prompt Engineering, Large Language Models (LLMs)
AI/ML NLP, Deep Learning, Neural Networks, Federated Learning, AutoML, Computer Vision (YOLO)
Data Analytics EDA, Data Visualization (Matplotlib, Power BI), Hugging Face Embeddings, Unstructured
Backend Tools REST APIs, Streamlit, Docker, Kubernetes, GitHub Actions
Software Engineering Logging Tracing, Observability, Multi-Agent Systems, Evaluation Frameworks

TECHNICAL EXPERIENCE

AI Engineer 09 2024 — Present
Deloitte USI

- **Production-Grade LLM Evaluation System**
 - Built a production-scale chatbot evaluation framework, adopted by **3+ teams**, leveraging custom **LLM-as-a-Judge evaluators, Langfuse, and GitHub Actions**; **reduced manual validation effort by 70%**, automated hundreds of evaluation checks per run, and enabled agent-level failure diagnosis through centralized observability dashboards.
- **Enterprise AI Insights Platform**
 - Developed **RESTful APIs using LangGraph** to deliver AI-driven insights, including intelligent prompt routing for complex query classification and automated formula-based KPI calculations; optimized prompt design to **reduce GPU usage by 75%**, lowering inference cost and latency.
 - Built a production-ready, **multi-user logging and tracing system supporting 20+ concurrent users**, significantly improving observability, traceability, and debugging across a Dockerized chatbot application.
- **CyberSec Automation**
 - Developed a **LangGraph MVP** to validate DSAT/SAST scans on GitHub commits and provide interactive vulnerability queries via Streamlit, streamlining code review cycles and **reducing manual verification by 20%**.
- **Multimodal Financial RAG**
 - Engineered a LangChain-based **multimodal RAG pipeline** for financial statement analysis, integrating text, table, and image data using **Unstructured, Gemini, and Hugging Face embeddings**; enabled natural language querying of complex financial datasets and demonstrated a proof-of-concept for automated financial insights.
- **AI-Driven Incident Detection and Response System**
 - Designed an end-to-end autonomous monitoring system leveraging **LangGraph-based agent orchestration, Gemini, YOLO, and GCP Ecosystem**, enabling real-time anomaly detection, weather-aware risk assessment, drone-assisted surveillance, and AI-driven corrective action recommendations.

ML Engineer Intern 05 2023 — 07 2023
TAFE Tractors and Motors Ltd.

- Performed EDA and feature relationship modeling, developed predictive forecasting models achieving **92% accuracy using AutoML (EvalML)**, and validated performance on synthetic datasets generated with **Gretel.ai** using optimized hyperparameters.

EDUCATION

B.Tech Computer Science and Engineering, Vellore Institute of Technology | CGPA: 8.27 2020–2024
Class XII, International Public School | 90% 2020

ACHIEVEMENTS/CERTIFICATIONS

OUTSTANDING AWARD – Recognized for building a scalable chatbot evaluation platform. 2026
Ranked 19th among 280+ teams in the Agentic AI Hackathon 2025
Publication – Hybrid Deep Learning for Disease Detection in Blood Smears using InceptionResNetV2 - Research & Publication (Ongoing) 2024
Certifications – Microsoft- AZ900, Microsoft - SC900, Google Agile Project Management 2024
Online International Conference(India, Philippines, Malaysia) - Debate 2018
International French Language Olympiad - 1026 Olympiad Rank 2016
